Photo 1 : Jose replacing broken and cracked tiles below garden gates. The Committee had previously agreed to have this work carried out and although the cost was paid for out of community funds it was also agreed to approach the owners of the properties affected by this work and ask for a voluntary contribution towards meeting this outlay.

Photo 2 : Work is now in full swing widening the roads from Guaramar to San Javier. According to our Administrators , who have been in contact with the local council, the N332 is being made into a dual carriageway , 6 new roundabouts constructed , a slip road either side of the " strip " is planned AND a bridge is planned over this dangerous part of the road.

Photo 3 : This photo shows the land next to the Consum Supermarket which has been cleared in preparation for the construction of a new police station !. It has been reported in the local newspapers that the new station should be open within the next 18 months. (that'll be a Spanish 18 months we think !)

Although it's early days yet the police have clamped down on the prostitutes using the roundabout to ply their trade and for the last 3 weeks have NOT been seen !. Should be interesting to see if they return .
